

Conservative Majority Sufficient to Form Government

Spencer Returned As Member for Battle River

The Mackenzie King government was defeated on Monday and the Conservatives led by R. B. Bennett will be called on to form a government. While the change from Liberal to Conservative was not entirely expected, it was predicted that the result would be close. However it is better that either one of the old line parties receive a good working majority so they can carry out their policies.

The results on hand as we go to press are as follows:

Conservatives 137; Liberals 86; U.F.A. 9; Liberal Progressives 3; Labor 3; Independent 2; doubtful 5, total 245.

Blatchford was defeated by Bury in East Edmonton, and Hon. Chas. Stewart retains his seat in Edmonton West by a small majority of 91.

Four of King's cabinet ministers were defeated and the prime minister himself was given a hard battle in Prince Albert.

The surprise of the election was the 24 Conservative seats gained in Quebec which has always been a Liberal stronghold.

The defeat of the King government is attributed to the general condition of depression which followed the collapse of the stock market last spring, failure to sell the western wheat crop at a good price, considerable unemployment, and the public mind thinking that a change of government would be a remedy. It remains to be seen. Mr. Bennett will have a good working majority to put his policies and promises into effect.

The final count in Battle River shows that Henry Spencer has a majority of 2976 over his Conservative opponent, Mr. Morrison. The final

count was 6889 for Spencer and 3913 for Morrison.

In the Camrose constituency W. T. Lucas, U.F.A. has a majority of over 2000 over D. R. Milver, Liberal.

The returns from the whole riding at noon on Tuesday with only two polls to hear from made the figures Spencer, 6782; Morrison, 3890; thus giving a majority at that time of 2892 for Spencer; while the voting in the several town centres in the riding was as follows:

Town	Spencer	Morrison
U.F.A.		Cops.
Amisk	37	28
Camogang	90	15
Chauvin	74	65
Czar	78	37
Edgerton	48	115
Fabian	24	1
Greenhills	64	20
Hardisty	47	113
Hayter	45	31
Heath	34	20
Hughenden	57	73
Imisfree	87	27
Irma	56	102
Islay	132	72
Jarrow	18	23
Kinross	115	77
Lloydminster	162	123
Mannville	63	157
Metiskow	65	21
Minburn	31	84
Provost	137	122
Ribstone	41	50
Rosyth	64	3
Vermilion	122	463
Wainwright	182	298

WIN TICKETS TO

WAINWRIGHT THEATRE

Mr. W. D. Nichol and Mrs. W. Cole have been drawn as the lucky persons for a free show at this theatre during the days of August 6-7-8th.

Free dancing in theatre last two nights of Wainwright Fair, August 5th and 6th, providing you have purchased a ticket to the picture during one of the three fair days. Dancing commences immediately after last show on Tuesday and Wednesday nights.

CHAUTAUQUA AGAIN VISITS IRMA

Tuesday night the Canadian Chautauqua again opened in the big brown tent north of the public school grounds. The tent has been filled at all the performances although we note that several faces that have always attended former years were absent this season. On account of the scarcity of money in the district some of the guarantors had predicted a big deficit but fortunately this will not be as big as expected. Miss Bessie Argue, has been here as superintendent and Mr. S. G. Olson, of Calgary has had charge of the tent. All of the performances and lectures have been well received. Most of the artists taking part in the programs have remarked about the wonderful crop prospects around Irma. In most of the districts through which they travelled the lack of moisture or hail damage has been reported but in the Irma district we have been very fortunate in securing an ample rain supply and with the exception of a few local storms very little hail damage has been reported.

SIXTH FORTNIGHTLY CROP REPORT — JULY, 26th, 1930

Rains have been general throughout the Province during the past fortnight, and have created a more optimistic outlook particularly in the southern area where hot dry weather has caused damage to dry land crops. On summerfallow and on irrigated land in the south, crops are good; those on spring prepared land will be light.

In the central eastern part of the Province fields which escaped serious damage from blowing and wet worms are making excellent progress. In many fields the stand is thin and patchy and reseeded grain is late. There is, however, assurance of ample feed for livestock.

Along the eastern half of the main line of the C. N. R. crops are good. North of this line, west of the C.P.R. from Edmonton to Calgary and in the Peace River district excellent conditions prevail. Plenty of warm weather to hasten maturity is all that is required. Grain in this area will mature about seven days later than last year, while south of Calgary harvest will probably commence slightly in advance of the usual season.

Oats and barley are growing rapidly and many heavy stands are seen. About fifty per cent of oats are headed and practically all of the barley.

Hail has been reported at a number of points, but does not exceed the average.

Hay is in progress. Alfalfa is making a very heavy second growth. Pastures are in good condition. Sugar beets are doing well.

TO DEMONSTRATE HONEY

The honey crop in Alberta promises to equal any former season both for quality and quantity. During the week of August 11th to 16th Miss L. Milne, who is an expert and has had considerable experience in using honey for cooking, making candy and preserving fruit, will give several demonstrations in stores at Irma, Wainwright, Hardisty and Viking. Watch next week's issue of the Times for further announcement and for the date and place in each town.

NO ALIBI FOR HON. BENNETT, SAYS GARLAND

E. J. Garland, federal member for Bow River, arrived in Edmonton on Wednesday morning and called upon Howard Stutchbury, the Alberta Trade Commissioner, and other officials in the city.

When asked if he had any comment to make upon the result of the election, Mr. Garland remarked: "Mr. Bennett, has a big majority and he cannot invent any alibi. He has to call a special session of parliament, cure unemployment, bring in protection, expand Canada's manufactures, sell Canada's wheat, revive the sheep industry and the dairy industry. Let him go to it."

"Pigs is pigs," and most persons have thought that dollars were dollars. Recently, however, it was pointed out that, in terms of 1914 purchasing power, the "automobile dollar" today is worth \$1.22, while the "cost of living dollar" is worth only sixty-two cents. More motor power to the dollar!

NEW PRIME MINISTER

HON. R. B. BENNETT

PERENNIAL SOW THISTLE

This king of thieves, whose victory in Manitoba caused thousands of hundred dollar acres to be offered for taxes, has been placed as the only Class "A" weed on our Noxious list which means that our Government is prepared to spend any sum necessary for the eradication of any infestation if the owner of the land will not comply with the law. To better acquaint the public with the appearance of the weed, potted plants have been placed in many of the store windows and these shopkeepers who were public minded have kept the same surviving. There has also been exhibitions at many public gatherings, fairs, etc., and there should be no reason for ignorance on the part of the public concerning the appearance of this weed. In the combat we consider public familiarity a primary step.

In the eradication of this weed, the directions, of chlorate chemicals has proven both successful and economical especially where cultivation is rendered difficult. When the patches are small the old rule of digging out and burning the roots every week throughout the year is hard to beat, when conscientiously carried out. In the cases where these patches are in cultivated fields no implement should be dragged through a patch, since this is a method of scattering the growing roots throughout the field.

In the cases of large infestations it is advisable to cut them in the blooming period, plow 4 to 5 inches deep just before freeze up, thus permitting the frost to kill many of the exposed roots, and this should be followed, as soon as the plant starts in the spring, by a cultivation once every week with a wide toothed duck foot cultivator or a rod weeder, thus never permitting a single plant to come above the ground and gradually effecting a smothering out of the infestation.

However, we much prefer advising methods of eradication where we know the type and lay of the land and the machinery and power of the farmer and for this reason we ask that you get in touch with your weed inspector or write us; giving the details, and you shall receive our immediate attention. — P. D. Huxley, Field Supervisor, Wainwright.

When a Laxative Gripes

--- BEWARE!

Severe abdominal pains, griping, after taking a laxative is an indication of unnatural strain that may cause serious injury.

No laxative that causes such discomfort is safe, or necessary.

ENOS is pleasant, gentle, safe and sure.

A daily dash of ENOS "Fruit Salt" in a glass of water, night or morning, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

ENOS

"FRUIT SALT"

The World's Grain Exhibition

The World's Poultry Congress is now in progress at the Crystal Palace, London, England, including a representative display of birds from Canada and with prominent Canadians identified with the poultry industry in attendance. A year or two ago Canada was honored by being host to the World's Poultry Congress, held in Ottawa, and which proved to be the most successful of these world's congresses held up to that time. Canada received most valuable publicity as a result, while the poultry industry throughout the Dominion was decidedly benefited thereby.

Canada is again to be host to a world's exhibition and conference in 1932, when the World's Grain Exhibition and Conference will be held in the city of Regina, Saskatchewan. It will be the greatest grain exhibition and conference ever held, with over \$200,000 in cash prizes, an unprecedented sum, to be awarded, while grain experts from all over the world will be in attendance to participate in the conference.

Already the response of countries in every hemisphere has surpassed expectations. To date nearly one million copies of the official prize list have been distributed in 84 countries. They have been placed where they will do the most good, and give a maximum of advertising to Canada, and Western Canada in particular, in every corner of the civilized world.

Canada as a country dependent on agriculture, and suffering all the growing pains of the young, needs this advertising, and even supposing no person from outside Canada attended the Exhibition and Conference at Regina, in 1932, the world-wide advertising already secured would be an ample return for all monies expended to date.

But the countries of the world will be represented, not only by interesting and instructive exhibits, but by leading agricultural experts. The Government of Canada officially issued invitations to other countries to participate and today—two years before the event—eighty countries have accepted. These are Peru, New Zealand, Guatemala, Poland, Czechoslovakia, Yugoslavia, Belgium and the Netherlands. The Governments of other countries, such as the United States, Great Britain, France, the Argentine, Australia, have asked for further and more complete information, and by 1932 it is expected at least 50 countries will have accepted the invitation and be present.

The management of the World's Grain Exhibition and Conference has taken advantage of the World's Poultry Congress, in London, England, this month to further its campaign for world-wide participation at Regina in 1932, and has sent an exhibit to London, and this week are entertaining, in London, the official delegates of 56 countries. At this luncheon the managing director of the World's Grain Exhibition will address these delegates and outline to them why they should participate at Regina. Afterwards he will visit the ministries of agriculture, of the countries of Europe, to drive that message home.

Exhibits of the World's Grain Exhibition are also being prepared for the Canadian National Exhibition, and the Royal Winter Fair, at Toronto, and the International Grain Show at Chicago.

This is what is being done to bring the world to Western Canada in 1932. But, and this is important, Western Canada should put forth every effort to retain for this country the world's championship wheat trophy. Other countries are going to try and capture it; we are asking, even urging them, to make the attempt. Western Canada must therefore look to its laurels. The wheat farmers of Western Canada—the best in the world—must be alert and put forth their best efforts, individually and collectively, to retain for this Dominion the proud title of the World's Wheat King.

Now is the time to prepare for the exhibition. It cannot be put off until 1932. It must be done in 1930 and 1931.

To Cope With Cancer

War-Time Mustard Gas Now Used For This Purpose

Use of war-time mustard gas in combating cancer is described in the annual report of the grand council of the British Empire cancer campaign.

The report said, "Mustard gas seems to be the first true anti-carcinogenic agent ever discovered." Action of the gases was explained as being localized to the particular area under treatment and its cure to be strictly limited in time. But none the less on that account a remarkable cure."

Baker Lake

According to the records of the Geographic Board of Canada, Baker Lake was so called in 1769 by Capt. Christopher of the ship "Churchill," who discovered the lake on ascending Chesterfield Inlet from Hudson Bay in that year.

A Tall Story

A borrower recently returned to a Canadian library a book he had taken out fifty years ago. They wrote "em long in the Victorian era—Kansas City Star.

Archbishop Opposed

To Death Penalty

Says It Lowers Conception Of Sanctity Of Life

The Most Rev. William Temple, Archbishop of York, is one of the few witnesses who has come so far before the Royal Commission on punishments to favor the abolition of the death penalty.

"I dissent from the view that punishment should be regarded as regulated vengeance," the Archbishop stated. "From a Christian viewpoint, vengeance is entirely illegitimate. The infliction of death or outlawry would, perhaps, be justifiable in the case of a man who was wholly evil but no person was ever that."

The main argument advanced by the archbishop from a sociological viewpoint was that the behaviour of a community as a whole was so largely imitative that the reaction to the taking of life by the state tended to a lower general conception of the sanctity of human life.

Summer Complaints

Kill Little Ones

At the first sign of illness during the hot weather give the little one Baby's Own Tablets or in a few hours he may be beyond aid. These Tablets will prevent summer complaint if given occasionally to the well child, and quite promptly relieve these troubles if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine as good and the mother has the guarantee that they are absolutely safe. They are sold by all druggists or by mail at 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

May Purchase Canadian Land

Another English Peer Interested In Farming In Dominion

The possibilities of southern Saskatchewan for ranching on a large scale were investigated recently by Lord Middleton, Yorkshire landowner, who is touring Canada with a view to purchasing land in this country. Lord Middleton specializes in breeding beef cattle on his 3,000-acre farm in the north of England. He recently made the decision to dispose of the whole of his estate, comprising some thousands of acres, driven to this step by the excessive burden of taxation to which every British landowner has been subjected since the war. It is his plan to take up land in Canada. He was an interested visitor at the Brandon Summer Fair, and in all the departments he visited, those in charge were rather amazed at the knowledge he had of farm affairs and of horticulture. He brought over to Ontario some fifty Yorkshire lads, who will be placed on Ontario farms.

Toothache and neuralgia are instantly relieved with Douglas' Egyptian Liniment. A quick sure remedy. Also recommended for burns, sprains, sores and inflammation.

Father Of Many Inventions

Sir Charles Wheatstone Gave Many Scientific Ideas To World

The concertina celebrated its centenary by Charles—afterward Sir Henry last year. It was invented and Charles—Wheatstone, in 1829. He must have been a wonderful man, for his inventions seem to have been legion. Sir Charles invented, for example, the stereoscope, by which the appearance of solidity is obtained through the mental combination of two pictures, and the polar clock, which made it possible to tell the time by the light from the sky although the sun might be invisible. It was he who made the electric telegraph available for the public transmission of messages. And in between his scientific studies he sandwiched the invention of our little musical friend the concertina.

Wax figures for store windows in London are being made to represent Helen Willis, Princess Elizabeth, Prime Minister MacDonald and other well-known people.

Illuminated cap badges are used by the messenger boys of a wireless telegraph company in London.

Thinning Hair

Stimulate your scalp and prevent thinning by massaging with Minard's. It gives hair new lustre.

MINARD'S

"KING OF PAIN"

PRINCE AND PEASANT

Signorina Maria Rizzati, Roman laundry girl, who has just married Prince Danilo, member of one of the oldest and wealthiest Italian families. The Prince called at the laundry to commend them upon the ironing of his shirts when he met his future bride.

To Patrol the Straits

Government Ice-Breaker Is Leaving For Northern Waters

The new government ice-breaker, the "N. B. MacLean," is to take her maiden plunge into Arctic waters early in August. The ship, which was launched at Halifax a few months ago, is named after Major MacLean, the government's chief authority on ice and ice-breakers, who commanded the Hudson's Straits expedition two years ago.

The ships will take up supplies to four directional wireless stations, established by the ministry of marine on Hudson Bay and named by wireless operators of the radio branch. These stations are located at Cape Hope's Advance, Resolution Island, Nottingham Island and Fort Churchill.

The ice-breaker will patrol the straits all through the fall months, and when the northern ice begins to close down will protect the ships in Hudson's Bay and through the straits.

Pleases Britain

Franco-Italian Naval Conventions Will Help London Naval Treaty

Prime Minister MacDonald told the British House of Commons recently, that the British Government had learned with pleasure of arrangements made by the governments of France and Italy with a view of facilitating resumption of discussions on naval questions.

Mr. MacDonald said the British government hoped these Franco-Italian conversations would complete the work of the London Naval Conference and that the principles of naval limitation, as contained in part three of the London Naval Treaty, would be applied to all parties to the conference.

He said it was not necessary for the British Government to take any action in this connection regarding the British naval program of 1930 since this was purely for necessary replacements within the reduced tonnage limits imposed by the treaty.

Persian Balm—there is nothing like it for treating and preserving a lovely complexion. Cooling, caressing—it soothes and dispels all roughness or chafe caused by weather conditions. Delicately fragrant, it adds exquisite charm to the most finished appearance. Dainty women inevitably choose Persian Balm. A velvety smooth lotion, it makes the skin rose leaf in texture. Recommended also to soften and whiten the hands. Truly a peerless toilet requisite for every woman.

Centenary Of The Match

France is preparing to celebrate in 1931 the centenary of the phosphorus match. It was 99 years ago that a young student, Charles Saunier, of Dole, dipped slivers of wood into liquid phosphorus and was able to light the match by striking it on a file.

Freshman: "What would you do if the girl you were calling on raved and shrieked that she never wanted to see you again?"

His Buddy: "I'd jump to my feet and leave."

"And let her fall to the floor?"

An exceptional coconut tree may produce as many as 500 nuts in a year.

Railplane Has Been Tested

Torpedo-Shaped Coach Is Driven By Two Propellers

The world's first experimental railplane system, backed by the London and Northeastern Railway, has been inaugurated at Milngavie, Scotland.

A torpedo-shaped coach driven by two aeroplane propellers, operating fore and aft, and drawing electrical power from the overhead rail to which it is suspended, flashed over an experimental stretch of track built above the main right-of-way of the London and Northeastern Railway.

It carried 25 passengers and is capable of developing a speed of 150 miles an hour on a long stretch of track, according to its designer, George Bennie, a Scottish engineer.

The railplane is England's answer to the demand of the aeroplane age for speedier transportation. The new system was inspected by delegates to the Transport Congress, which met in Glasgow. If it wins their approval, plans for a railplane system between Blackpool and Southport, a distance of 25 miles, will be carried out.

A railplane system can be built at one-third the cost of a double track railway system, say the London and Northeastern experts.

Each railplane coach will be self-propelled and will run alone. The overhead rail will direct the course and guide rails will keep it from swinging. The car is stopped by reversing the propellers, which then act as brakes.

The aerial railway can be erected over roads, canals or as in the present instance, over railroads, without interfering with the ground traffic. Thus, in the case of railroads, a ground line could be used for freight, while the air line could be used for speedy passenger service and the carrying of mails.

Show Decided Increase

Progress Reported For Creameries All Over Alberta

Alberta creameries during the first four months of the year have shown an increase of 4.4 per cent. over the similar period of 1929, and 35 per cent. above the same period of 1928. Creameries in the south of the province showed an increase of 1 per cent., those in the central part a similar increase, and those in the northern zone a 19 per cent. increase.

Complete in itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

Nanking Is Ambitious

Has Extensive Plan To Reconstruct City In Big Way

Nanking, China, proposes to reconstruct the city in a big way. Already 77 proposals of improvements have been adopted. Among them are the construction of a river port, installation of a waterworks system, opening of a metropolitan park and a Grand Metropolitan Museum, provision for three clinics, promotion of industry and the opening of factories, development of afforestation, and laying out of a beautiful residential district.

Foods Stay Fresh Longer This Way

Covered with Para-Sani Heavy Waxed Paper goods that usually stale in a day or so stay fresh for quite a long time. Try it. Get Para-Sani in the handy, sanitary, knife-edged carton at grocer, druggist or stationer. For less exciting uses get "Centre Pull" Packs in sheet form.

HEADACHES

Needless pains like headaches are quickly relieved by Aspirin tablets as millions of people know. And no matter how suddenly a headache may come upon you, you can always be prepared. Carry the pocket tin of Aspirin tablets with you. Keep the larger size at home. Read the proven directions for pain, headaches, neuralgia, etc.

Artificial Wool

Artificial Sheep Will Grow Wool Indefinitely, Say Scientists

That artificial sheep will grow real wool indefinitely is the prediction of the British Research Association for the Wool and Worsted Industry following recent experiments in the hair growth of animals. By merely slicing off pieces of live sheepskin and placing them in vats containing a certain chemical solution, the pieces may be continuously nourished and thus produce hair year in and year out. Cowhide also might be treated in the same way, say the association's chemists.

Morning Eggs Weigh More

Tests Show Them Heavier Than Those Laid in Afternoon

Tests conducted on different chicken farms by C. Howard King, poultry supervisor of the Wisconsin Department of Agriculture and Markets, revealed that eggs laid in the forenoon weigh 24.115 ounces a dozen while those laid in the afternoon averaged only 23.539 ounces, according to a report from Madison, Wisconsin. This suggests another problem for commercial egg producers—how to make hens lay in the forenoon—and bigger eggs.

Minard's Liniment for Lumbago and Neuralgia.

Game In Canada

The physical characteristics of Canada—its innumerable lakes, extensive forests, and great open prairies—combine with its natural geographical situation to constitute a distinct faunal region within which is to be found almost every species of game native to the North American continent.

Canada Has Maintained Lead In Silver Fox Ranching Industry, Which Is Steadily Growing

Canada was the first to develop the breeding of silver foxes in captivity, and she has so maintained her position in this respect that she is regarded as a world-leader by all other countries, whose representatives periodically visit the Dominion in search of knowledge and advice in the conduct of similar undertakings. While silver fox ranching has been exploited here and there by individuals who have been stressing its financial possibilities, yet the industry as a whole has developed along sound and economic lines, due in the first place to the foresight of the pioneers and to the valid and conservative methods of the fox breeders of Prince Edward Island who nursed the silver fox industry through its infancy.

The Canadian National Silver Fox Breeders' Association is the largest breed society in the Dominion and registers annually a larger number of pedigreed animals than is found in any other specialized live stock. The 70,883 silver fox pups born in 1929, and registered by this association, are descended from less than a score of silver foxes taken from the wild by the pioneer breeders. The remarkable growth of the silver fox industry is indicated by the figures of the last four years taken from Canadian Live Stock records, of silver fox pups registered by the above association: 1926, 32,335; 1927, 39,767; 1928, 51,624; 1929, 70,883.

While Prince Edward Island is still the cradle and the home of the industry, silver fox ranching is being firmly established in practically every province of the Dominion, and is operating on a very large scale, more particularly in the province of Quebec. Silver fox ranching has also become established in a great number of European countries, and heavy shipments of live foxes are made annually from Canada, 2,558 having been exported from Prince Edward Island alone in 1929.

While there has been a larger sale of live silver foxes as breeding stock during the last few years than ever before, yet these animals represent only about 25 per cent. of the silver foxes produced. The main function of silver fox ranching is the production of pelts. In fact, large numbers of the ranches are no longer interested in the sale of live foxes. As a consequence there has been a rapid increase in the number of silver fox pelts coming into the market, but, as the number has increased, a wider and more general interest has been shown in silver fox fur by fur buyers and by the fur trade as a whole. This has resulted, generally speaking, in a steady increase in the prices obtained for silver fox furs. Of course, as was to be expected, the financial stringency of last autumn had a marked effect on the prices of all pelts at the December and January fur sales, but silver fox furs were less affected than any other class.

During the last two decades of the 19th century before foxes were raised in captivity, it has been estimated that between 2,000 and 3,000 silver fox pelts were placed upon the market annually. For the past two years over 100,000 silver fox pelts have been absorbed each year by the fur trade, and, as the number of captured wild animals has not increased, it is estimated that wild pelts comprise only about 2,000 of this number. This estimate is confirmed by the fact that at the different fur auctions pelts of wild foxes formed less than two per cent. of the total offerings.

New School For Indian Reserve

It is officially reported that \$60,000 is to be spent on improvements to buildings in the Indian Reserve at Gleichen this summer. The finishing touches are now being put on the new school recently built on the Reserve at Gleichen.

"They say: Time is money! If I had as much money as I have time, I'd be a millionaire."—Hummel, Hamburg.

Heavy Livestock Losses

Cattle and Pigs Die From Bite Of Black Fly

From eastern Saskatchewan have come reports of considerable damage to cattle and hogs from the attacks of a small fly. A species of tiny black fly, known as Simulium, is causing heavy livestock losses on farms near Saskatchewan River, where the flies breed. In the Pike Lake district, at least seven head of cattle and three pigs have died from the effects of the flies' bites.

Eggs of the flies are laid on exposed stones near running water. When the river rises and the water washes over the stones the friction causes the eggs to hatch.

When the flies are thick, animals should be housed, the University of Saskatchewan veterinary department advises, and haking soda and water should be used to reduce swelling and lessen pain.

Favourite Canadian Apples

McIntosh, Spy, Gravenstein, Delicious and Baldwin Are the Favourites

Canada has a wide range of apple varieties and the question as to which of these is the most popular provides a good deal of interest. In a survey conducted by the Fruit Branch of the Dominion Department of Agriculture, the McIntosh was shown to have a marked preference in Canada generally. Next came the Spy, then the Gravenstein, then the Delicious, and then the Baldwin.

(By Annebelle Worthington)

Enhance your charm by wearing flattering jacket costumes. It is a season of jackets!

The one sketched is in green crepe silk print in combination with egg-shell.

The skirt shows slenderizing line in pointed hip yoke treatment. The jacket is in popular hip length.

Style No. 3436 comes in sizes 14, 16, 18 years, 36, 38 and 40 inches bust.

It is stunning with the dress made of chiffon print in hyacinth blue colouring, with the jacket of flat silk crepe in matching shade.

Yellow and white sportswear linen with plain yellow sheer lining for simulated tuck-in bodice is very chic.

Pastel flat silk crepe, shantung and cotton or silk shirting swaggar.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

"The Western Producer," of Winnipeg, in publishing the illustration reproduced here says: "Canadian (Western) hides have a rather bad name amongst tanners, due to the fact that so many of them carry large brands on the most desirable part of the hide. Forty quarter brands are least likely to spoil a hide."

Grain By Bay Route

Seventy-One Years Ago Grain Was Imported From Britain Into Hudson Bay

Workers are toiling today on the steel and concrete framework of the grain elevator at Churchill, to aid in the movement of the 1931 wheat crop over the Hudson Bay route. But 71 years ago the Bay route was used for the shipment of wheat—at that time to the prairies which now supply consumers in all parts of the world.

In 1859 some eleven thousand bushels of wheat and seven thousand bushels of flour were imported for prairie settlers. The bulk of these supplies came to Red River (now Winnipeg). In the round-bottomed sailing vessels which braved the dangers of the northern route. Seventeen years later Manitoba shipped out its first wheat down the river to Duluth, Minnesota, and thence by rail to Toronto.

In the interim the western prairies have swelled their grain producing expanse, until half-bushel bushel crops have become an actuality. And advancing trade is preparing to move out over a bay route used by grandfathers of folk who toil today.

Study Sheep Industry

Will Make Economic Survey Of Sheep Raising In The West

Dr. J. H. Gradale has announced an economic survey of the sheep raising industry in Saskatchewan, Alberta and British Columbia this summer. The Agricultural Economics Branch and the Experimental Farms of the Dominion Department of Agriculture, will co-operate in carrying out the survey. This survey, which will include a complete study of conditions in the sheep ranching industry, marks the beginning of a program of research work in agricultural economics on behalf of the Livestock industry. It is anticipated that between 150 and 200 sheep ranches will be visited in the three provinces. Departmental experts will be assisted by representatives of the respective Provincial governments and of Livestock Associations in carrying out work of the survey.

Wife: There's one thing about my mother; she's outspoken.

Husband: Not by anyone I know.

Empire Games at Hamilton

Hamilton, Ontario, will be the centre next month of the British Empire Games to which athletes from all the Dominions and the Mother Country will flock. E. W. Beatty, chairman and president, Canadian Pacific Railway, is chairman of the national committee of the A.A.U. of Canada for the Games, and promises of support have been received by the committee from Australia, New Zealand, Africa, British Crown Colonies, the Irish Free State, Northern Ireland, while a strong and representative British committee has been formed to ensure full British participation at this notable sports gathering of the British peoples. Canada, will, of course, be very fully represented, practically every province sending its outstanding athletes. The Games are scheduled to be held August 16-23.

Pale Western Cutworm One Of Worst Pests With Which Farmers Have To Contend

Will Exhibit At Big Show

Belgium To Take Part In World's Grain Exhibition

According to word received at the headquarters office at Regina, Belgium has officially accepted the invitation to take part in the World's Grain Exhibition and Conference, to be held at Regina from July 25 to August 6, 1932.

Belgium of course became very well known for the part it played during the Great War. It may be interesting, however, to note that Belgium and The Netherlands are two of the smallest but most densely populated states in Europe. In area they are together not so large as the province of New Brunswick and are but one-tenth the size of Manitoba. The population of each is, however, about equal to the whole of Canada. Belgium also governs the Belgian Congo in Central Africa.

Because of the density of the population in these small countries it becomes necessary to make the very best use of every square of the people possess. One Canadian writer says, "If their farmers farmed as we farm it would be impossible for so many of them to exist in such a small land, but, by their thorough methods of cultivating the land, and their industry, care and thrift, the Belgians have become a very prosperous people." According to "The Statesman's Year Book, 1930," Belgium, in 1928, produced 9,790,000 cwt. of wheat from 430,282 acres; 1,900,148 cwt. of barley from 76,172 acres; 14,063,478 cwt. of rye from 579,085 acres. In addition to these field crops, the farmers produce immense quantities of sugar beets, potatoes, flowering bulbs and dairy products. With such a record the great value of Belgium's contribution to the exhibition and conference of 1932 is assured.

Fish Industry

Canada Ships Fish To Almost Every Part Of The World

There aren't very many corners of the world where Canadian fish in one form or another is not sold.

Last year Canadian fish and fish products found markets virtually all over the world and accounted for nearly \$36,000,000 of the export totals in the Dominion's trade returns. Canada's exports of fisheries products in 1929 amounted in value to more than twice the imports.

The exports vary from frozen smelts and canned sardines to canned whale meat, but the biggest single item, in point of value, is canned salmon, virtually all of it from the great canning industry of British Columbia. In 1929 nearly 11 million pounds of Canadian canned salmon were sold abroad, with the sales representing \$8,865,000 in value. Australia and New Zealand were purchasers to the amount of more than \$2,700,000. Sales to the United Kingdom had a value of \$1,780,000, in round figures, while purchases by France totalled \$1,709,000 and Italy took canned salmon to the value of \$738,000. About 25 or 30 countries were buyers.

Shortage In Egg Production

Report Shows Extra Grade Is Becoming Quite Scarce

The production of eggs is still declining all over Canada, states the weekly egg and poultry report of the Dominion Department of Agriculture. The market is generally inclined to be firmer, particularly extras, which grade is becoming quite scarce. While there has been no material advance in prices of eggs, as yet, there is a much stronger undertone. At some of the larger consuming centres in the east local receipts of eggs are not sufficient to meet the consumptive demand.

New Grievance Against Autos

Farmers of Scotland have found a new grievance against the automobile. Entries to the fall fairs this year are to be few because, they say, the increasing number of cars make it unsafe to drive their choice livestock along the highways leading to the events. Some sheep owners plan to buy machines to transport their exhibits.

Mystery Bus Trips A Novelty

Dublin, Irish Free State, has just introduced auto-bus mystery trips as a novelty. Passengers are given a fifty-mile drive every evening during the summer for 60 cents. There is a stop of one hour at popular resorts. The route is not announced beforehand in order to arouse interest.

The pale western cutworm is one of the worst insect pests with which the farmers of Alberta and Saskatchewan have to contend. Its presence in a field in the spring depends entirely on the condition of that field during August and early September of the previous season. For this reason, this warning is issued so that farmers in these two provinces may prepare their fields this summer to avoid trouble next spring.

The weather conditions during the early season of 1930 have been such as to practically ensure an enormous increase of the pale western cutworm over a large area in both Alberta and Saskatchewan. In fact, it appears now as though these provinces would have the most widespread and devastating outbreak of this insect that has ever occurred.

The outbreak will be most severe in Alberta from Edmonton south to the Lethbridge-Medicine Hat line of the Canadian Pacific Railway, and east of the McLeod-Edmonton line. There will undoubtedly be some increase south of Lethbridge and Medicine Hat and farmers in that area will do well to handle their fields accordingly.

In Saskatchewan the outbreak will probably be quite general from Saskatchewan south to the border. The most severe damage will probably occur in a 100 mile radius of Regina. The isolated local outbreaks which occurred in 1930 over the rest of Saskatchewan west of a north and south line through Indian Head and Abernethy will probably increase in intensity and spread in all directions so as to make a general outbreak with severe conditions scattered throughout.

Wherever possible, farmers are urged to keep entirely off their fields from the first of August until the middle of September. Summerfallow should be well worked during July so that all weed growth is destroyed and then left untouched. No stock should be allowed to run on the land and no machinery taken across it.

The adult moths of the pale western cutworm lay their eggs during August and early September. The eggs are always laid in soft, dusty soil and any fields which have the soil surface slightly crusted will be largely avoided by the moth. In most soils a light rain is sufficient to form this protective crust and if the last cultivation is followed by such a rain the crust, if formed, should not be broken in any way.

Fields which are in crop that must be harvested during August will have the surface crust destroyed by these operations and the cutworms will be present there next spring. If the crop is such that it can be left until the middle of September or can be cut and stacked before the first of August nothing should be allowed to disturb the soil crust between those dates.

The entire problem during a pale western cutworm outbreak can be simply expressed as follows:

1. Any fields in which the soil surface is crusted and undisturbed from the first of August to the middle of September will be reasonably free of cutworms the following spring.

2. Any fields in which the soil surface crust is broken or disturbed between the first of August and the middle of September, are reasonably sure to be infested with cutworms the following spring. If such fields are seeded the crop will probably be destroyed.

The only hope of growing crops successfully over the outbreak area in 1931 if the foregoing recommendations are not followed depends entirely on the spring rainfall. Wet season during next May and June with frequent heavy rains may reduce the amount of damage. When the soil is wet the pale western cutworm does not feed as heavily or destroy as many plants as it does when the soil is dry.

More detailed information can be secured by writing to the Dominion entomological laboratory at Lethbridge, Alberta; Saskatoon, Saskatchewan; Indian Head, Saskatchewan; or, Tresebank, Manitoba.

Holidays on Horseback in West

Year by year the idea of Dude Ranching as a holiday recreation that really means recreation, is taking greater hold on young and old alike all over the continent. Horseback riding, trail riding, taking part in rodeos—if you are a good enough cowboy—but anyhow on horseback from morning to night, that is the way to harden the muscles and bodies of people who have gone soft in the over-civilized life of cities. This totally different kind of a holiday is offered in any of half a dozen Dude Ranches in the Alberta Foothills and the Rockies. There is the historic Kananaskis Ranch, owned by Mrs. "Dill" Brewster; the T. S. Ranch, operated by Guy Weadick; the Lake

Windermere Girls Camp and the E. Y. Ranch, recently opened by Miss Emily Yates of Montreal, to name a few. The holiday-maker attires him or herself in weird and wonderful cowboy outfit from high-heeled boots and chaps to ten-gallon hat and tries out everything—roping and tying calves, packing mules and ponies and learning all the mystery of the ancient craft of knot-tying, riding the mountain trails and sleeping out of nights—just a real western open-air holiday. Lay-out shows typical scenes from the Kananaskis Ranch;—Society buds hog-tying a calf; a party of riders all set for a day's outing and a glimpse of the exciting business of erecting a teepee.

The Rockies Are Calling You

The combination of the extremes of natural and sophisticated at Banff Springs Hotel and Chateau Lake Louise, which open May 15 and June 1, respectively, until September 30, is perhaps the secret of their charm. Located in the heart of the finest scenery of the continent—mountain, lake and forest—each offers to the visitor everything that the most ritzy hotel in the most cosmopolitan cities of the world can furnish. You may cut dancing to look through huge windows at slices of billion-dollar scenery or you may attire yourself to please yourself and go out for days on horseback into territory virtually untouched by the

white man and all within a few miles of either hotel. You may live plainly but well on food packed into the wilds by horse or you may dine on exotic dainties drawn from the ends of the earth. You may be strictly formal or you may wander around in plus fours—everything goes, whether you are admiring the moonlight on snow-crowned peaks or listening at your ease to a cosmopolitan dance orchestra playing the latest blue. Anyone visiting either of these hotels has laid in a memory that will last a lifetime. Lay-out shows, left, view from Chateau Lake Louise; lower right, the Banff Springs Hotel.

WHERE R-100 WILL "LAND"

Extensive preparations for handling the huge crowds who are expected to greet the monster dirigible upon its arrival at St. Hubert Air Field, near Montreal, from England, are being made by the Canadian National Railways. Special trains will be operated from Bonaventure Station to St. Hubert, where trackage is being installed specially for the handling of this service. The photographs show: Left, the huge mooring mast constructed in preparation for the arrival of the R-100. Upper, trackmen at work installing sidings in preparation for the special trains which will be operated during the dirigible's visit.

NEWS ITEMS FROM KINSELLA

Mrs. Fred Green and daughter Dorothy arrived home after spending a couple of weeks visiting at the home of Mr. and Mrs. Geo. Lawrence at Fabyan.

The Kinsella Community Picnic held last Wednesday, July 23rd was fairly successful in spite of the various attractions at other nearby places that day, also the extremely hot weather, which made it rather uncomfortable for sports.

Jim Lee of the Kinsella Hotel had a booth on the grounds and supplied the crowd with refreshments.

The various races were run off satisfactorily and on the whole everybody seemed to enjoy the day's activities.

There were several baseball games played, the honors going to the Lake Vernon team. Also a very good softball game played by the young ladies which was enjoyed by many onlookers.

Many of those present availed themselves of the fine water in Lake Hattie and took a dip in the water. It is the wish of many that a community picnic of like nature can be made an annual event, and of course improved upon as time went on, so as to make it really worth while.

Thanks are due those who gave their time and effort to make this day so successful.

The day's sport was followed by a dance in Kinsella. Owing to a severe electrical storm there was only a small attendance, but nevertheless a good time was had by those who did attend.

The government Tree Planting Car will be on the track at Kinsella on August 1st until morning of August 2nd. There will be slides showing how beautiful a home can be made by planting a few trees, also instructions on how to plant them for best results. This is all free and should be well worth going to.

The crop conditions remain the same, that is, first rate. Rain is coming plentifully and often and the hot weather is certainly bringing the crop along in fine shape. The wheat is filling fast and it will only be a matter of a short time before the binders will be humming. Practically no damage has been done by large hail. The gaucis too are showing wonderful growth. Most all the farmers are using new potatoes and they taste good.

A very successful dance was held in E.K. Horne's barn on Friday, July 25th. The floor was fine and plenty of room in spite of the large crowd. Music was furnished by the Night Hawk orchestra.

Some few days ago the people in the Overleigh district put a day of sports which was reported much enjoyed by all that attended. The scene of activities was at Lake Hattie.

J. J. Overbo will be doing bartering work at the Kinsella hotel on Saturdays and will be glad to meet his old patrons, also in hopes of making new ones.

A dance will be held in the Lake Vernon School on Friday night, August 1st.

PRINTING — THE UNIVERSAL AGENT

Printing is indispensable; it is the universal agent whereby the whole of civilization lives, moves and has its being. It takes no effort of imagination to foresee the state of chaos that would follow the world-wide cessation, for one week, of all printed matter, for the life of each one of us is moulded and influenced, both directly and indirectly, by what is daily set up in type.

Naturally, to meet the increasing diversity of modern demands, the art of printing has been developed to a very high degree, and so sensitive a medium it is that it behaves every one who has occasion to use printed matter to bear in mind the importance of quality; for it is by the quality of one's printing that one's status is judged. Poor or indifferent printing is wasteful extravagance; good printing is an investment. — The Viking News Job Department, Phone 19.

NEWS ITEMS FROM JARROW

JARROW NEWS
Last Wednesday quite a number of people turned out to the U.F.A. and U.F.W.A. picnic held at Pendleton's lake. Everybody reported a very enjoyable time.

Mr. and Mrs. Luxton and Gordon Bell left last Monday for Innisfree where they will visit with their relations.

Mr. R. T. Meskins, painting contractor, of Jarrow, has finished painting Batt School and has gone to Viking where his tenure was accepted for painting the Ribstone Hill School.

Mr. and Mrs. Austin and family are visiting at the home of Mr. and Mrs. James, south of Jarrow.

Mrs. G. Comley returned last Thursday from the Wainwright Hospital and is improving greatly.

Quite a few from Jarrow are attending the Chautauqua in Irma.

Mr. Paul Loring who is in the Viking Hospital with a broken leg is improving nicely. We all hope he will soon be able to return home.

Quite a few from Jarrow attended the dance held at Horne's last Friday. All report having a very nice time.

Mr. and Mrs. H. H. Miller have visiting with them, their sister-in-law, Mrs. Miller.

A new post office is being built in Jarrow to take the place of the one burnt down. It will soon be completed, as the work is well under way now.

TREE PLANTING CAR HERE

MON. & TUES. AUGUST 4th-5th
The Tree Planting Car of the Canadian Forestry Association will be in Jarrow on Monday, August 4th and Tuesday, August 5th. Equipped to show both slides and moving picture, and carrying not only those dealing with all phases of tree planting and kindred subjects, but some beautiful views on the scenic beauties of Canada, its wild life, and some graphic fishing pictures. Those who take the opportunity of visiting the Car during its stay, will not only be instructed in tree planting, but will find a programme both educational and highly entertaining.

A meeting will be held in the evenings at 8 p.m. for adults, when a very interesting radio talk by Geo. Watt, well known tree planting authority, will be given, illustrated by over 60 colored slides, followed by two reels of moving pictures of tree planting, after which will be shown five other reels ending with a comedy.

The Car will also be in: Kinsella on Friday, August 1st. Phillips, on Saturday, August 2nd. Torlea, on Wednesday, August 6th. Bruce, on Thursday, August 7th.

WANTED

There are in our locality some distressed families who would be very grateful for left off clothes, shoes, etc. If there are any who can supply this need will be kind enough to take them to Mrs. Cole, (town), and they will be delivered.

WANTED—Situation for summer months. Phyllis E. Thurston, Irma. 2-tp.

VIKING

A big crowd gathered in the E.K.s Community Hall on Thursday evening last to hear "The Debate." Filled with lively expectation, everyone wore a happy smile on entering. The good-natured battle produced more smiles, and all appeared satisfied with the evening's entertainment.

The subject of the debate was "Resolved that the interest of Canada would be best served by the prairie provinces now electing and sending a strong representation of farmers to the next federal parliament." This was a thought-provoking topic, and timely in view of the approach of the Federal Election. On the affirmative three doughty word-warriors appeared in the persons of Sigurd Lefsrud, B. C. Gilpin and Robert Armstrong. Opposed, on the negative talk-fest, were the following famous forensic duelists, C. G. Purvis, Mrs. Hyslop, and H. G. Thunell.

It was quite evident that both sides were armed "to the teeth" and a noble battle was to be fought. J. L. Dods occupied the chair and acted as timekeeper. His humorous threats to those who attempted to transgress the rules and regulations of the debate were well received. Careful observation of these rules made for impartial treatment of all participating. One knew beforehand just how long a speech was to last and sometimes feared that the bell would act like the guillotine and leave the head right off the otherwise good speech.

The judges chosen for the ocerous job of deciding by scientific methods just which side had won, were Rev. J. W. Bainbridge, Mrs. H. B. Collier and Dr. Little. The fact that forty minutes were required for the judges to tabulate the arguments presented, weigh, and mark, indicates how carefully this work was done.

And while this judging was in progress an impromptu program was staged that Pantages might envy. Step-dancing, grizzly-bear-shivers, music by the Collins-Harper duo, produced a series of events that were delightful.

And then the judgment. The affirmative won by a narrow margin.

One item on the program was not foreseen. The flashes of wit were reflected manifold in the sky in lightning of terrific brilliance, while heavy thunder and torrential rains accompanied. While Mr. Armstrong was speaking the lights went out completely. But he went serenely like a ship in the night, and quite captured the crowd by his eloquence under the adverse condition.

The proceeds of the evening were presented to the Agricultural Society. The donation of \$25.00 was duly appreciated by this worthy group.—H.B.C.

One of the heaviest rains that this district has experienced fell last Thursday evening. The rain gauge indicated that almost an inch and a half fell in short time. The water is standing in many of the sloughs that have been dry for years. Some parts of the district report a percentage of hail damage, but on the whole the crops are looking excellent.

George Verner arrived here from Paradise Valley on Monday for a short visit before proceeding to his home at Stettler. He was accompanied to Stettler by his sister Mrs. Harland Hilliker.

Mr. and Mrs. D. I. Duncan left for Calgary Monday evening. They received the sad message that their daughter Mrs. McCrae of that city had died suddenly.

Mrs. P. E. Finch and daughter Miss Aileen and Miss Ruth Vivash left on Sunday for Vancouver where they will enjoy a holiday.

One of the features of the movies next Friday and Saturday evenings is the showing of the Sharkey vs. Schmeling fight pictures.

Herman Kjelland and family and Lars Wollen and family attended the funeral of the late Mrs. Egedhal at Provost on Sunday, July 29th.

Rev. H. T. Egedhal, of Provost, was a guest of friends here over the week end.

Little Allan Jones left for Irma on Monday to visit at the home of his uncle Percy Jones.

Mr. and Mrs. Them Kjar of southern Alberta, are guests at the home of Mr. and Mrs. Trauman.

Mrs. Geo. Loades left on Monday for a visit at the home of her daughter, Mrs. H. Little at Wainwright.

Mr. and Mrs. Geo. Martin and Miss Gail Crumner of Turner Valley, are guests at the home of Mr. and Mrs. C. A. Dupre.

Mrs. Clinton and Miss Bettie Conson, were guests of friends and relatives in Edmonton the first of the week.

Mrs. Halberg was a visitor at Ryley on Monday.

Mr. and Mrs. Alex Farquharson left on Monday evening to spend a few days in Edmonton.

Mr. and Mrs. Freddie Loades returned on Monday from their honeymoon trip.

The United Church School Picnic is postponed until Thursday, August 14. Further particulars later.

WORLD HAPPENINGS
BRIEFLY TOLD

The Rockefeller Foundation has decided to give \$450,000 to the University of Sydney, Australia, for medical research.

The Irish Free State, like Great Britain, gave the European union a note cool treatment in a note responding to Foreign Minister Briand's questionnaire.

British Columbia's lumber industry is holding its export markets better than Washington and Oregon, according to H. R. MacMillan, leading exporter.

The Canadian Bank of Commerce shipped \$1,000,000 in gold to Canada, from New York, the first important shipment of the yellow metal across the border since 1927.

Value of building permits issued in 61 Canadian cities during June was \$17,936,478, according to a report issued by the Dominion Bureau of Statistics.

"Pure invention," was how Sir Godfrey Thomas, private secretary to the Prince of Wales, described a story that the Prince plans a United States visit and Canadian "camping holiday" this year.

Seven thousand specimens of poultry from 23 countries, including Canada and the United States, went on exhibit in the Crystal Palace, London, England, for the World's Poultry Show.

To commemorate the action of the 700 Indians who deeded to the British crown all land extending west to York, a cairn will be erected at Carrying Place, Prince Edward County, Ontario. A 25-foot plot at the main corner of the village has been chosen as the most suitable location.

The death occurred of James M. Coleman at his residence, 356 Oliver Avenue, Montreal. Mr. Coleman was a well-known figure in railway circles and was the inventor of the Coleman locking device, which prevents passenger cars from telescoping in a railway collision. He was in his 70th year.

Anxious To Capture
Market In Canada.Australia Makes First Shipment Of
Oranges For Distribution

The first shipment of Australian oranges to enter Vancouver, 5,000 cases from Sydney, N.S.W., was unloaded recently for distribution at various points throughout the Dominion.

To capture the Canadian market for Australian orange growers is the aim of the wholesale fruit distributors organization of Sydney, which two months ago sent W. H. Pearce here to pave the way for the drive. Claiming that the Australian fruit surpasses the best from the United States, the fruit growers of New South Wales believe that their product will quickly win a large share of the market that the United States producers now enjoy.

Banded Bird Law

Co-Operation With Proper Authorities
Is Required

It is important that any person who finds a banded bird report the fact to the National Parks of Canada Branch, Department of the Interior, Ottawa, giving the species of the bird, band number, date and locality of occurrence, and information as to whether the bird was found dead, was killed, or was released alive still wearing its band. Persons reporting banded birds will be informed promptly respecting the place and time of banding.

Scotsman: "How much to press a pair of trousers?"

Agent: "One shilling."

Scotsman: "Then press one leg for sixpence—I am having my photograph taken side view."

She: "And don't you ever forget that I threw over a millionaire's son just to marry you."

He: "Yes that guy was not only born rich but lucky as well."

"Have you heard of the new medicine that's put in coffee and takes away all liking for whiskey?"

"Heavens! I'll never dare drink coffee again."—Kariakuren, Oslo.

W. N. U. 1848

Novel Attempt To
Escape From Prison

Robber Serving Sentence In Sing Sing Sowed Up In Mattress

A novel method of attempting escape from Sing Sing prison was uncovered when guards found Jack Levy within a mattress made in the prison factory. Levy, small and middle-aged robber, almost got away with it. He would now be on his way to freedom but for the curiosity of Victor Brown, keeper-chefeur, who thought a pile of mattresses on his truck looked suspiciously lopsided although it had been twice inspected by other guards.

Brown summoned Principal Keeper Sheehy and a search was instituted. Sheehy ripped open one misshapen mattress and discovered Levy. Levy had a razor with which to cut his way out, and a hammer. The robber will be sent to Clinton prison, Dannemore, N.Y. His attempted escape will put back his earliest possible date of release to 1932. Levy was sowed into the mattress from the outside. His accomplice has not been found.

Tuning Out Noise

Idea Of Scientist, If Carried Out, Would Be Boon To World

A person is in an office that looks out on a busy street, and traffic is roaring past mink normal speech inaudible. He touches a switch and the noises fade away to nothing. The traffic is still streaming past, but one cannot hear a sound. That is the promise made by a well-known scientist, Dr. James Robinson. Dr. Robinson's idea is that sound waves might be "tuned out" in the same way as we get rid of unwanted broadcasting stations on our wireless set. Special apparatus built into the walls of a building will "trap" the sound waves and in this way we really shall get silence. Every day the mechanical world in which we live gets noisier and noisier.

(By Anabelle Worthington).

The chic femininity and girlish prettiness of this yellow and green printed rayon crepe will instantly appeal to the sophisticated miss of 16, 12 and 14 years.

The flaring skirt shows soft gathering at front, and slight dipping at either side. A crushed grille marks the normal waistline and ties in youthful bow at side.

The simple bodice is sleeveless. The capelet collar of plain yellow crepe is most unusual, opened at front displaying round neckline. An applied band of the printed crepe provides smart trim.

Style No. 3360 is very effective for parties made of pale blue georgette crepe with collar finished with picot edge.

Printed batiste, dimity, voile, tub silks and printed lawn make up smartly.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

CHARMING YOUNG PRINCE

Photograph shows Crown Prince Michael, of Roumania, who was recently relieved of the cares of king when his father, Prince Carol, returned and took over the throne he renounced, with his faithful dog.

Patrol Northern Highway

Mounted Policemen To Watch Traffic On Prince Albert National Park Road

Mounted Police in Saskatchewan assumed a new role when a member of the scarlet-coated force heads northward from Prince Albert recently on a brand new motorcycle to inaugurate the system of patrols on the Prince Albert National Park Highway. Speedsters will have to watch their step in the future, for if they exceed thirty miles an hour the mountie may get them and then a line up to the maximum of \$100 awaits the offender on conviction.

Other regulations to be enforced require motorists to keep on the right of an imaginary line down the centre of the highway, to make sure his vision to the rear and to each side is not obstructed and not to catch up and pass another vehicle at a blind curve.

Heavily loaded trucks with loads protruding beyond the sides of the vehicle will be required to pull well out to the side and stop if necessary to permit an approaching vehicle to pass. There are no set hours for the patrol, but it will be maintained throughout the day, and at times when traffic is particularly heavy. The mounted policeman astride his motorcycle will be seen at night slipping along the highway to check up on reckless drivers.

Recipes For This Week

(By Betty Barclay)

PEANUT BRITTLE APPLES

SEI large tart apples; one-fourth teaspoon salt; three-fourths pound peanut brittle; and four tablespoons lemon juice are required. Spread thinly sliced apples over the bottom of a baking dish. Sprinkle with salt, and repeat until all the apples and candy are used. Pour lemon juice over top layer of apples before adding the last layer of brittle. Bake in a slow oven at 325 degrees for one hour.

PINEAPPLE ORANGE SPONGE

1 package orange flavored gelatin.
1 cup boiling water.
1 cup pineapple juice and cold water.
1 cup shredded pineapple, drained. Dissolve gelatin in boiling water. Add pineapple juice and cold water. Chill. When slightly thickened, beat with rotary egg beater until consistency of whipped cream. Fold in pineapple. Turn into molds. Chill until firm. Unmold. Serves 8.

Wit and Philosophy

Puns are not always properly attributed to their original author—possibly because puns have been condemned as the lowest form of wit. But some are worthy to live.

Here is one which sums up whole systems of philosophy, but it was originally aimed at George Berkeley's (1685-1753) contentions regarding matter and mind.

"What is mind? No matter. What is matter? Never mind."—Christian Science Monitor.

The Modern Maid

In answer to the advertisement of a Weymouth, England, boarding house keeper for a housemaid, one girl demanded a salary of \$225 a year, every Sunday and three evenings a week off, and a garage for her motorcycle.

Indians Celebrate

Celebrate Third Anniversary Of Right To Cross International Boundary Without Interference

The red man, once proud ruler of the Niagara frontier, came back into his own for a brief period on July 19. More than 500 Indians from the United States and Canada, members of the Six Nations Defense League, celebrated the third anniversary of their successful fight for the right to cross the American-Canadian border without regard for immigration "red tape."

Many of the Indians were in full regalia, feathers, war paint and all. The parade formed in front of the city hall at Niagara Falls, Ont., and Indians afoot, on horse and in automobiles, accompanied by pale-face officials, marched along the Niagara river bank and across the Falls View bridge to the Niagara Falls Power Company's ball park, where the celebration was staged.

The sacred wampum was a feature. It was closely guarded by Chief Moses Odjick, wampum keeper of the Algonquins, from Manitowick, Quebec, and his aides. According to the Indians, the wampum is thousands of years old. To the white man, the wampum is nothing more than a few strands of bead work with Indian figures worked upon it. To the red man, it is the story of the Great Spirit guarding his children. Indian dances had a prominent part in the celebration.

Tom Longboat, one time Canadian marathon champion, was at the picnic and exhibited his trophies. Silver Smith, herb doctor from Grand River, was there, too, and told of his reputed cures. An Indian canoe builder was on the job and fashioned a birch bark canoe.

Testing Packing Cases

New Machine Has Old-Time Baggage Smasher Backed Off The Map

A machine, known as a "hazard machine" and installed at the Forest Products Laboratories, of the Department of the Interior, Ottawa, is used for testing the strength of packing cases and other containers. The machine consists of a drum seven feet in diameter and eight feet in width, erected in a vertical position and slowly revolved by an electric motor. In the drum is a series of floors arranged in the form of a hexagon. As the drum revolves, the container being tested drops from floor to floor, metal guides causing it to drop successively on corners, sides, and edges. The condition of the container at the end of the test indicates where it needs strengthening.

Aged Rider Issues Challenge

Eighty-five-year-old Col. E. R. Gregge-Hopwood, of Middleton, England, has challenged any rider of his age to a steeplechase match for \$5,000 a side. The match would be over fences on a two-mile course. Sir Claude de Crespigny, 81, is eager to accept, but is barred. "I cannot afford to give away four years," says Colonel Hopwood, who has been riding to hounds three or four times a week in season for years.

Captain Sherlock Has
Newest Air Record

Flew Mail Plane 1,500 Miles In One Day Making Five Stops

Record achievements in the air are just part of the day's work in the north country. The newest feat, unheralded almost among the brilliant exploits of the sub-Arctic fliers, is that of Captain W. N. Sherlock. Commercial Airways pilot, in less than 24 hours, he flew the mail from Fort McMurray, in northern Alberta, to Akavik, on the topmost rim of Canada—some 1,500 miles—making five delivery stops en route.

Son of Sir Francis and Lady Sherlock, Irton Hall, Cumberland, England, Captain Sherlock is a former member of the Royal Air Force. He has seen war and peace-time service in France, India, Egypt and Mesopotamia. Before joining the Commercial Airline, he was a member of the flying staff of Dominion Explorers.

On the morning of June 26, at 5:45 o'clock, Captain Sherlock took off from Fort McMurray air base, flying a Bellanca Pacemaker. Less than 21 hours later, at 2:25 o'clock the next morning, with the midnight sun casting its twilight glow, he landed the mail at Akavik, within the Arctic circle. On his way, he made postal deliveries at Fort Resolution, Fort Simpson, Fort Norman, Fort McPherson and Arctic Red River along the rushing Mackenzie River.

Captain Sherlock's flight—just one of the records set up by fearless airmen speeding to and fro across the barren lands of the northwest—was the first one-day flight from Alberta to Akavik.

When Aviators Trespass

Judge Rules People Own Air Five Hundred Feet Up

Aviators must fly at least 500 feet high to avoid trespassing on property over which they pass, Federal Judge George P. Hahn, of Cleveland, Ohio, ruled in a precedent setting decision.

The decision was on a bill of complaint brought a year ago by two suburban property holders against the Curtiss Airport Corporation, the Ohio Air Terminals Company and the Curtiss Flying Service. The complaint cited the ancient Roman legal principle, "Whosoever controls land controls it from the centre of the earth to the zenith," and sought an order forbidding planes to pass over the property.

Judge Hahn ruled that the "effective possession" of such property extends only 500 feet up.

On Arbitration Board

Appointment has been announced of the Rt. Hon. Mr. Justice Duff, of the Supreme Court of Canada, to act as Canadian representative on the arbitration board in connection with the "I'm Alone" proceedings. Mr. Justice Duff succeeds to the position made vacant by the death of the late Eugene Lafleur, K.C.

In acid soil, hydrangeas bear blue flowers, whereas in neutral soil they bear the "normal" pink blossoms.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN

Household Hints

SUGGESTIONS FOR THE USE OF HONEY IN THE HOME

The following recipes have all been tested.

Please note that all measures are level, and that flour should be sifted once before measuring.

ORANGE AND NUT BREAD

1 egg yolk, 1 cup milk, 3 cups flour, 1-2 cup chopped walnuts; 4 tpsns baking powder, Rind of 3 oranges, 1 cup honey, Salty water, 1-4 cup water.

Cut the rinds of oranges in small slices. Boil in salt water until soft (about 1-2 hour), drain well and boil very slowly in 1 cup of honey and 1-4 cup water until very thick. Beat egg yolk thoroughly. Add milk flour sifted with dry ingredients. Then add orange strips and honey mixture while still warm. Add chopped nuts. Place in well greased loaf tin and bake slowly one hour. Should make two loaves.

Steamed Brown Bread

2 cups Graham flour, 1 cup corn meal, 2-3 cup honey, 2 cups sour milk, 1 tpsn salt, 1-2 tpsn soda, 1 tpsn boiling water, 1 cup raisins.

Mix together the corn meal, flour and salt. Add the sour milk and honey and soda dissolved in boiling water, last the raisins. Steam 3 hours in a well buttered covered pan. Do not have more than 2-3 full to begin with. Serve with honey baked beans.

Afternoon Tea Suggestions That Are Different

Honey Cinnamon Toast—Butter toasted bread, spread with honey and sprinkle with cinnamon. Reheat sufficiently to blend cinnamon and honey. Serve hot.

Orange Nut Bread Toast—Place thin slices of bread on a pan in the oven and toast both sides. Butter and spread with orange marmalade. Cut in triangles and serve hot.

Honey Cheese Wafers—Toast saltines until crisp. Spread with the following mixture: One tablespoon cream cheese, 2 tpsns chopped nuts, 1 tpsn honey. Mix cheese and honey and add nuts.

SANDWICHES

Orange Nut Bread and Cream Cheese—Use the bread at least three days old. Cut thin, spread one slice with butter, the other with honey cheese and nut mixture used on the wafers given above.

Honey Date and Nut Sandwiches—1-2 cup chopped dates, 1-2 cup warm honey, 1-2 cup chopped walnuts, Mix well and spread on Graham bread. **Honey and Cheese**—Mix honey and cream cheese until a smooth paste is formed. Vary by adding chopped nuts or pimento or olives.

Cakes and Cookies

Honey Almond Rolls

2 cups cake flour, 1 cup butter, 1 cup finely chopped almonds, 1 cup honey, 4 egg yolks, 1-3 tpsn salt. Cream together butter and honey. Add beaten yolks, flour and almonds.

Mix thoroughly. Shape the dough into rolls about 3 inches long and as thick as a finger. Bake in a hot oven 15 min.

Ginger Snaps

6 tpsns honey, 6 tpsns shortening, 1-2 cups flour, 1-4 tpsn soda, 1-2 tpsn ginger, 1-4 tpsn salt.

Heat the honey and shortening to boiling point. Cool and add the dry ingredients which have been sifted together. Chill and roll out very thin. Cut, place on buttered sheet and bake 6 to 8 minutes in a hot oven.

Honey Oatmeal Drop Cookies

3 cups flour, 3 cups oatmeal, 1 cup seedless raisins, 1 cup honey, 1-2 cup sugar, 1 tpsn vanilla, 1-4 cup sweet milk; 1-4 tpsn soda, 1-4 tpsn salt, 2 tpsns baking powder, 1 cup nuts, 1-2 cup shortening.

Cream butter, honey and sugar together. Sift flour measure and sift with dry ingredients. Add oatmeal and nuts mixed, chopped raisins and vanilla. Drop with a spoon on a well greased baking pan and bake 20 minutes in a hot oven.

Honey Date Strips

3 eggs well beaten, 1 cup honey, 1-1-2 cup flour, 1 tpsn baking powder, 1 tpsn vanilla, 1 cup chopped nuts, 1 lb. chopped dates.

Mix together the honey and well beaten eggs. Add the flour and baking powder sifted together, then dates and nuts. Bake in a long flat tin. Mixture should not be more than 1-4 in. high. When baked it will be about 1-2 inch high. Cut in strips 1-2 inch wide and 3 inches long. Pack in a crock and roll in powdered sugar before serving.

THE MUSICIAN AND HIS NAMES

Hearing strains of music sweet And words to the song, Knowing how to guide it, The player glides along.

Unequaled in the melodies, How beautiful they sound; Of Mother's old time lullabies, And lovers lays unending.

Giving ear then to listening, And looking over to see, I saw a young boy sitting With his guitar on his knee.

He sat there in the twilight And the tinted sunset bold Shone on his golden locks so bright Made a picture to behold.

Boys like nicknames, this I know, I have told his real name too; Look at the beginning of each verse Learn it in the four letters first.

In the verse just above these lines The nickname of him you will find; A jolly young fellow is he to meet, In him you'll find no deceit.

—By Mrs. G. F. Albrecht.

Main Street

Mr. F. M. Weise and family are spending their vacation at Banff.

Mr. C. Sellers of Edmonton's visiting with the Locke family who are relatives.

Mr. S. Johnson and family have been spending a week at Banff and other points.

Mr. and Mrs. Ross McFarland returned Monday after a pleasant vacation at Banff and Calgary.

Mr. and Mrs. Berg of Holden spent the week end with their daughter Mrs. J. Fletcher.

Miss Maud Smallwood is expected home on Saturday for a three weeks vacation.

Mrs. Wood of Hanna is visiting her sister Mrs. Geo. Hipperson.

Don't forget to get your entries in time for the Fair, which will be held August 12th and 13th.

Mr. and Mrs. W. Postous of Vancouver, spent the past week at the Tripp home while on their way to Saskatoon.

Mr. Fred Thoresen who has been visiting his daughter Mrs. P. E. Jones, left Tuesday to resume his duties with the C.N.R. at Vermilion.

Mr. R. Keeley and Mr. A. White returned Wednesday after spending a month's vacation at Edmonton and B. C. Points.

Mr. and Mrs. Earl Tomlinson are spending their vacation at Mrs. Tomlinson's former home at Riley.

Mr. and Mrs. L. T. Skiles left Tuesday for a motor trip through Alberta. Dr. Greenberg left for Edmonton Monday with Mrs. Curfman who had been taken seriously ill a few days before.

Miss M. E. Price expects to return from her vacation in time to commence teaching her music pupils in Irma by August 15th, and in Jarraw on August 16th.

Mr. and Mrs. J. Bishop returned the first of the week after spending their vacation at Edmonton and other points.

Mrs. Harry Bouck of Heath returned Thursday after spending a week with their parents Mr. and Mrs. F. Peterson.

Mr. and Mrs. Sid Bouck of Carstairs have returned after spending two weeks with Mrs. Bouck's parents Mr. and Mrs. Howard Peterson.

When in Banff, stop at the Homestead Hotel and meet your Alberta friends. Ask to see the last edition of the Irma Times and get the latest news from home.

Mr. John Jack has accepted a position as grain buyer at Poe, the next station to Riley and expects to leave in a week or so for his new location.

The C. G. I. T. Girls had charge of the services at the United Church last Sunday night when under the leadership of Mrs. Jack they put on a very interesting service. Mr. Geson is expected back from his vacation in time to conduct the service next Sunday.

The Irma Women's Institute will meet at the home of Mrs. Flewelling on Thursday, August 6th at 2:30 p.m. Roll Call: My favorite vegetable. Hostesses, Mrs. McFarland and Mrs. Rae.

Mr. and Mrs. Brown, Mrs. A. M. Flewelling, Miss Ida and Master Clyde Flewelling of Lacombe, Mr. and Mrs. J. N. Flewelling, Miss Hazel and Master Roy Consort, Mrs. McKilligan Smiley visited at the homes of Mr. and Mrs. R. J. Tate and Mrs. M. A. Flewelling.

New signs advising the travelling public that they are passing through Irma, and asking motorists to drive carefully, have been placed on the roads entering town. Under the conditions of most of the "Roads and streets motorists will be well advised to heed this warning lest they end up with a broken spring or cracked skull. Gravel is being placed on Main Street and some cinders have been put in some of the holes. The early rains the early part of the summer kept most of these holes filled with water which helped the cars dig deeper all the time.

ISSUE RULES FOR FARM PROSPERITY

Ottawa, July 26th — The following rules have been formulated by agricultural experts here as an aid to better and more lucrative farming:

1. Farm because he loves it; few people succeed in doing things they are not interested in.

2. He should adopt a sound financial policy in his individual farm operation, and investment of any surplus funds which he accumulates should be in securities which he can convert quickly into cash when needed. Corporations or business men usually invest their surplus funds in good stocks and bonds not necessarily allied with their own business, with a daily market value so they can be immediately converted into cash if needed in their business. Farmers, when possible, should follow this principle.

3. Plan his work; keep in close touch with his Provincial Agricultural College, experiment station and county agent.

4. Have his soil analysed and cultivate only productive land; base his production on demand as near as possible, and produce quality products.

5. Join with his neighbors in organizing a co-operative marketing association through which to sell his products because in union there is strength.

RECOGNIZED MAN

AFTER FORTY YEARS

An unusual incident occurred to J. H. Hilliker, of Kamloops, B.C., last Friday morning. When a man walked into his store he just looked at him casually thinking him a prospective customer and went into the feed room, but as he passed he glanced at the man again and said, "I know you." The stranger looked at him and replied, "No, you don't, I have never seen you before." Then Mr. Hilliker said, "Don't you come from Viking, Alberta?" The surprised visitor admitted this and it turned out that the stranger was Mr. Hilliker's cousin, Basil Hilliker, whom the former had not seen since he was a small boy of six or seven.

It was a curious experience for the Alberta man as he was not expecting to see his cousin and the very fact that he recognized him after not seeing him for forty years or more was most extraordinary. Mr. Hilliker said that he recognized his cousin by his eyes.

Mr. and Mrs. Basil Hilliker stayed with their cousin over the week end and visited many points of interest in the district before continuing their journey to the coast by car. They were greatly impressed with the lovely gardens and beauty of the scenery. —Kamloops Sentinel, B.C.

DEATH OF MRS. EGEDHAL

The news of the sudden death of Mrs. H. T. Egedahl at Provost on July 17th was a shock to a host of friends in this district. Mr. and Mrs. Egedahl resided among us from 1917 until 1924 when Mr. Egedahl was pastor of the Lutheran church at this place.

Mrs. Egedahl died from a hemorrhage of the brain, which seized her on July 17th, from which she did not recover. Burial took place at Provost on Sunday, July 20th.

She leaves to mourn her loss, her husband, two daughters, Irene and Esther, and one son, Ernest.

The deceased was born at Montevideo, in 1879 and was a long time resident in Alberta.
